

A modern living room interior featuring a white fireplace mantel with a circular mirror and a colorful abstract painting. Two large, patterned armchairs are positioned in the foreground, and a white sofa with orange and blue pillows is visible in the background. The room has large windows on the left and a kitchen area on the right.

Interior Design

Why Interior ?

Interior design is business-oriented course

- The undergraduate Interior Design Programmers at Dream Carrier integrate hands-on learning, starting with ideation, drafting floor plans, site assessment, the science of construction, material selection, space design and proportions, service systems, Vastu Shastra, etc.

- The course will help in creating an environment that will combine real-world needs with cutting-edge solutions to create entire spatial experiences. Students will learn to conceptualize for a range of residential and commercial spaces using various design tools and software.

About Interior ?

- Interior design is the art and science of enhancing the interior of a building to achieve a healthier and more aesthetically pleasing environment for the people using the space.
- An interior designer is someone who plans, researches, coordinates, and manages such enhancement projects

COURSES

Bachelor of interior Design: It is a three-year undergraduate course dealing with clothing and accessory design. This course offers a holistic learning experience for students by providing both classroom and training sessions. In this course, students learn about hand draft projects software's concept base furniture etc.

Diploma of Interior Design: Master of Interior Design is a two-year postgraduate program focusing on research practice and specializing in design thinking. This program helps students' aptitude and skills and prepares them for the real world as Interior design professionals.

Fast Track Diploma In Interior Designing: A diploma in interior designing is a skill-oriented course of 12-18 months' duration. With a wide variety of subjects covered, students learn everything from the specifics of design to starting and sustaining a brand.

Specialization Courses

- Certification in Interior Styling
- Certification in Kitchen Design
- Certification in Landscape Design
- Certification in Vastu Shastra in Interior
- Certification in Set Design

A AUTOCAD

AutoCAD is often used to **create blueprints and floor plans for houses and commercial buildings**. It also comes with built-in tools that can analyze and remedy weaknesses in a building's design.

SketchUp

Sketchup Architecture is 3D modeling software which deals with a wide range of drawing applications such as **interior design, architectural drawing, and modeling, designing of landscape architecture elements, mechanical and civil engineering drawings, designing of video games as well as film 3d models** and so on.

V-Ray for SketchUp

V-Ray® for SketchUp is a **3D rendering software that combines real-time and photoreal rendering** — all in SketchUp. From beginner to pro, Chaos® V-Ray has all the tools you need to visualize your 3D architectural projects from start to finish.

Adobe Photoshop

Though it's primarily an image editing program, Photoshop has many functions that are useful for interior designers. **Filters, renderings, and transformation tools can enhance your presentations, improve your visual communication, and bring your design ideas to life**

Bachelor of Interior Design

First year

Semester 1
Basic Designs
Graphics
construction
Dream project
Material bord

Semester 2
Design project I (RESIDENCIAL)
Plan learning
Section learning
3d views
Finishing & designs

Second year

Semester 3
Kitchen project
Working drawing
Construction II
Plumbing (practical)
Electrical (practical)

Semester 4
Design project II (COMMERCIAL)
Lift & elevator
Sound insulation
Thermal insulation
Introduction of software

Third year

Semester 5
AutoCAD
SketchUp + V-ray
photoshop
Thesis project
Ac detailing

Semester 6
Estimate & buget
Vasudhara
Swimming poll
Professional practices
Portfolio & internship
